OBD-L Memory Saver Adapter

Prevents loss of vehicle data

Handy compact voltage maintenance device. Always connect to the OBD interface (OBD II) before replacing the battery. Easy to use and no loss of vehicle data. The OBD-L adapter is a useful addition to the two Banner Power Boosters PB12 and PB12/24. In principle, compatible with any power source that has a cigarette lighter socket.

FEATURES

- **Fully automatic**
- **Standard fuse protection**
- **Easy to understand 3 - step instructions printed on the unit**
- **Automatic detection:** automatically detects if the vehicle's electronics allow the unit to back up the on-board data.
- **LED – indicator:** Two yellow LEDs at each end indicate that the connection to the OBDII port and the connection to the portable power supply are OK. Red LED (Do not proceed) or green LED (Proceed) indicate if it is safe to remove or service the vehicle's battery without losing data, stored in the vehicle's microprocessor-controlled devices.
- **Works on all vehicle's equipped with a standard On-Board Data (OBD II) port.**

APPLICATIONS

Consumer / Professionals

For the entire automotive sector.

TECHNICAL DATA

Type: Voltage maintenance device

Dimensions [cm]: ca. 17 x 12 x 7

Weight [kg]: ca. 0,33
